

 Michigan Automotive Compressor, Inc. Quality Assurance Manual for Suppliers	Document Number:
	QA-SM-06
	Page 1 of 1
Subject: Material Certification	

PURPOSE:

Material Certifications are necessary to show that the raw materials being used in production meet the requirements of MACI and our customers.

SCOPE:

Evidence certifying the chemical and physical properties is necessary to indicate that the raw material meets specifications. In many instances, based on MACI customer requirements, the supplier will also be required to obtain a laboratory analysis report from a third party lab that is A2LA Certified.

CONTENT:

The supplier must provide a mill certificate or laboratory analysis of the raw material heat or lot that was used for the PPAP lot. Also, the supplier may be required to provide a third party laboratory analysis of chemical and physical properties from an A2LA certified lab. If third party certification is necessary, it will be indicated on the Quality Standard issued by MACI.
